CESTINI PORTARIFIUTI

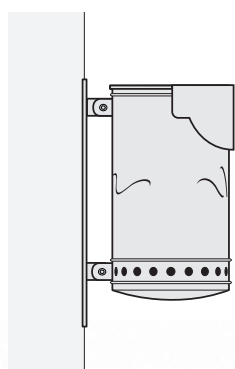

LITTER BINS

Contenitori in lamiera di acciaio punzonata e rullata, con fondello saldato. La bocca superiore è apribile per il fissaggio e la rimozione dei sacchetti. Sono montati su paletti con struttura in tubo di ferro con decori in fusione di alluminio, oppure su paletti in fusione di alluminio. Fissaggio al suolo in plinto di fondazione.

The container, on which is possible apply the heraldic crest, is made in steel grate or sheet. The upper section is openable to permit insertion and removal of plastic waste bags. Are mounted on small poles in steel tube with decorations in aluminium cast, or on small poles entirely in aluminium cast. Fixing to the ground by foundation plinth.

DISSUASORI

Elementi d'arredo urbano aventi funzione di dissuasione dell'accesso veicolare a zone pedonali e centri storici. Disponibili nelle versioni compatibili con l'inserimento di catene od al fine di realizzare più complesse composizioni. I dissuasori sono realizzati in unica fusione di alluminio o in alternativa in misto di ferro-carpenteria ed elementi decorativi in fusione.

BOLLARDS

Urban furniture elements designed to deter vehicular access to pedestrian areas and historic centers. Available in versions compatible with the insertion of chains or to create more complex compositions. The bollards are made of a single aluminum casting or alternatively in a mix of iron-carpentry and decorative elements in casting.

FINITURA E VERNICIATURA

I getti in fusione sono sabbiati, sbavati e finiti artigianamente.

La verniciatura è eseguita nel colore nero antigraffio in due separati cicli di applicazione; primer tixotropico anticorrosivo ferromicaceo al alto spessore e finitura trasparente semilucida bicomponente a base di poliuretanaica.

Applicazione in procedimento elettrostatico ed essiccazione a forno per 30 minuti a 60° C.

Questo processi garantisce un'ottima protezione contro l'invecchiamento e gli agenti atmosferici.

FINISH AND COATING

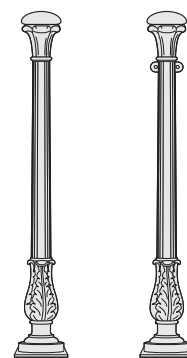

The castings are sand-blasted, trimmed and finished with artisan methods.

The painting is in a non-scratch black colour with two separate application cycles; a thick coat of anticorrosive, thixotroèpic, iron based primer followed by a trasparente polyurethane based semi-shiny finishing.

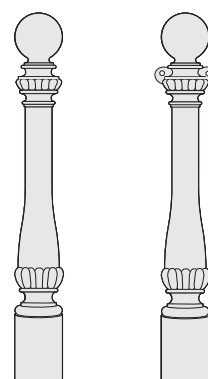

They are applied with electrostatic procedures and furnace dried for 30 minutes at 60° C.

This process guarantees excellent protection against ageing and natural weather agents.

ARTICOLI PER TOPONOMASTICA E PUBBLICITÀ

Per la sezione toponomastica offriamo soluzioni complete e per la segnalazione monumentale e per l'identificazione di luoghi. I telai per cartelli e stendardi, i basamenti, i supporti a ventaglio per i pannelli e le cimase, sono realizzati con fusione artistica di alluminio verniciato a polveri, garantendone non solo un gradevole aspetto estetico, ma anche solidità e durevolezza all'esposizione agli agenti atmosferici.

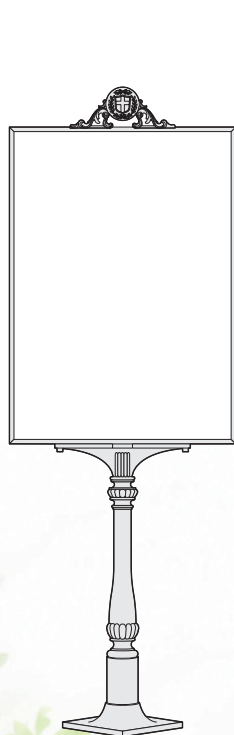

For the toponymy section we offer complete solutions for monumental signalling and for identifying places. The frames for signs and banners, the bases, the fan-shaped supports for the panels and the cornices are made with artistic casting of powder-coated aluminium, guaranteeing not only a pleasant aesthetic appearance, but also solidity and durability when exposed to atmospheric agents.

PANNELLI DIBOND

I Dibond sono pannelli compositi per applicazioni outdoor, costruiti con un'anima in Polietilene nero ad alta densità (HDPE), racchiusa fra due lastre di alluminio.

La stampa su dibond garantisce il miglior risultato quando si vuole realizzare una stampa di grande formato, adatto ad i nsegne esterne e pannelli informativi grafici.

DIBOND digital is the first aluminium composite material with a lacquer system that is optimised for direct to substrate digital printing. The surface of the new DIBOND digital provides enhanced ink adhesion for UV-curing and solvent based links.

TOPONOMASTICA IN MARMO
